

Sweet Finger Roll

How do I get the best quality from my rolls?

Did you know?

Storing buns in a chilled environment will speed up the staling rate!

Top Tip!

Keep the roll covered in it's original packaging as long as possible prior to use to avoid staling.

Top Tip!

Avoid defrosting and re-freezing the products. Doing so reduces the freshness.

Did you know?

Defrosting whole cases of product at once leads to flat and misshapen products!

Step 1

Retrieve the case from the freezer and remove the required amount of products. Close the outer case and return to freezer.

Step 2

Defrost products in their packaging on a flat surface or tray at an ambient temperature – avoid defrosting whole cases without decanting.

Step 3

Defrost products for 1 hour before use

Step 4

Warm up some icing in a bowl – dip the sweet finger roll from end to end. Allow icing to set for 5 minutes prior to merchandising.
